Summary of Jefferson County's Policy on Entrances

(For further details see Jefferson County Ordinance 6-15 effective 11/17/1993)

1. The property owner or tenant is responsible for installation and providing all materials for the initial entrance construction or modification of existing driveways.
2. The access location must provide adequate sight distance and meet the entrance specifications provided on the attached detail sheet
3. The County Engineer's Office will determine the required pipe diameter if required, and culvert pipe material type. After installation, the culvert pipe shall become property of Jefferson County Road Department.
4. Entrance shall be constructed using compaction, shall not interfere with the traveled roadway and must be completed within six months of the time of application.
5. The County Engineer shall approve the completed installation before accepting it.
6. Jefferson County will maintain any entrance within the right-of-way that has been installed with an approved permit and constructed according to County specifications.
7. Jefferson County does not furnish, maintain, nor pay for any driveway surfacing for roadway accesses.
